

UC-3 Record of Decision

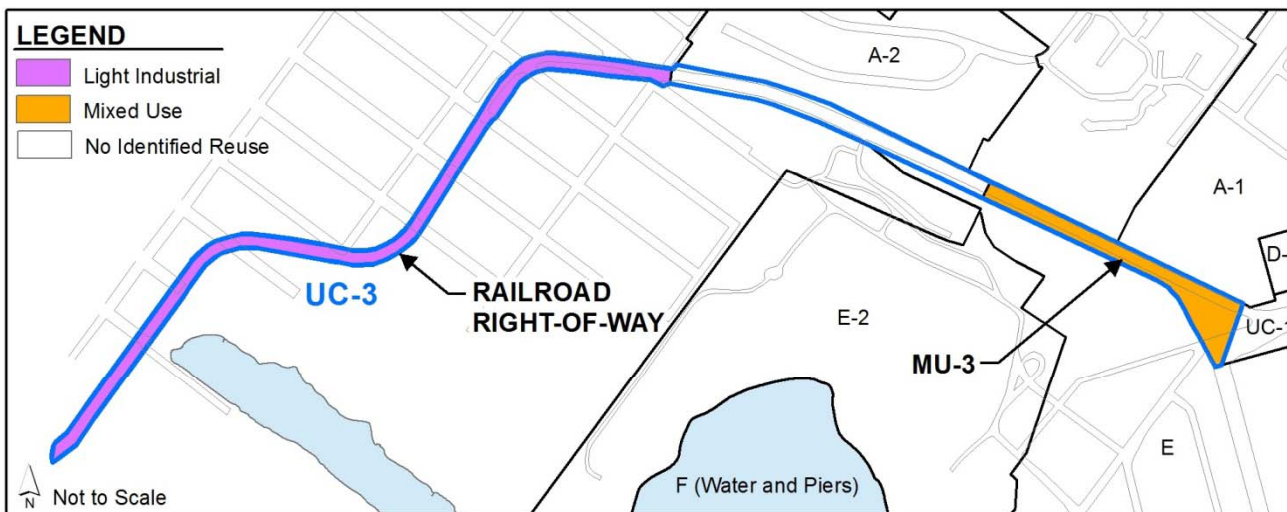

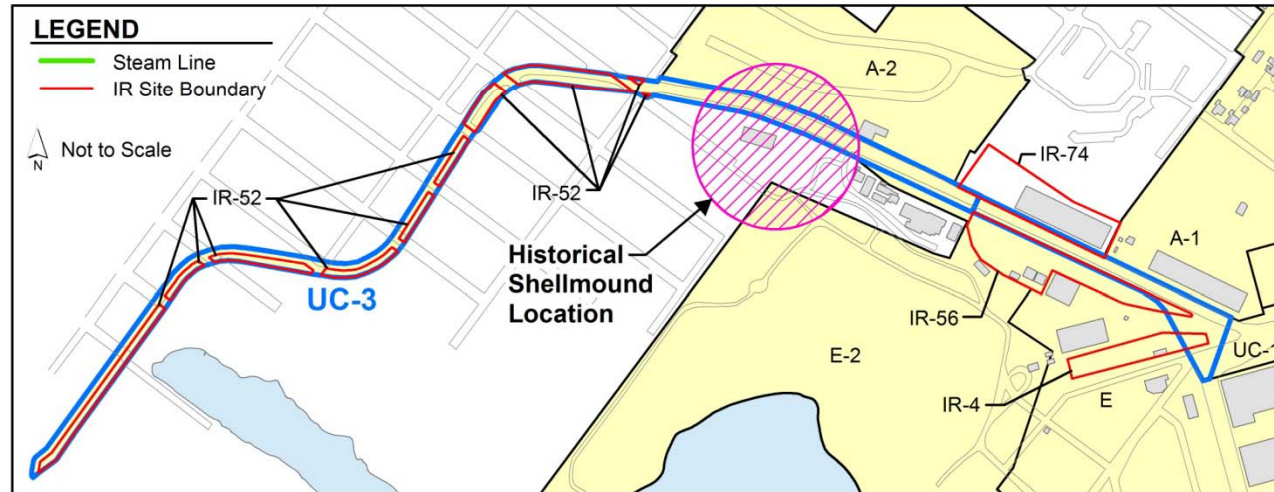

BRAC Cleanup Team (BCT) Meeting

July 27, 2013

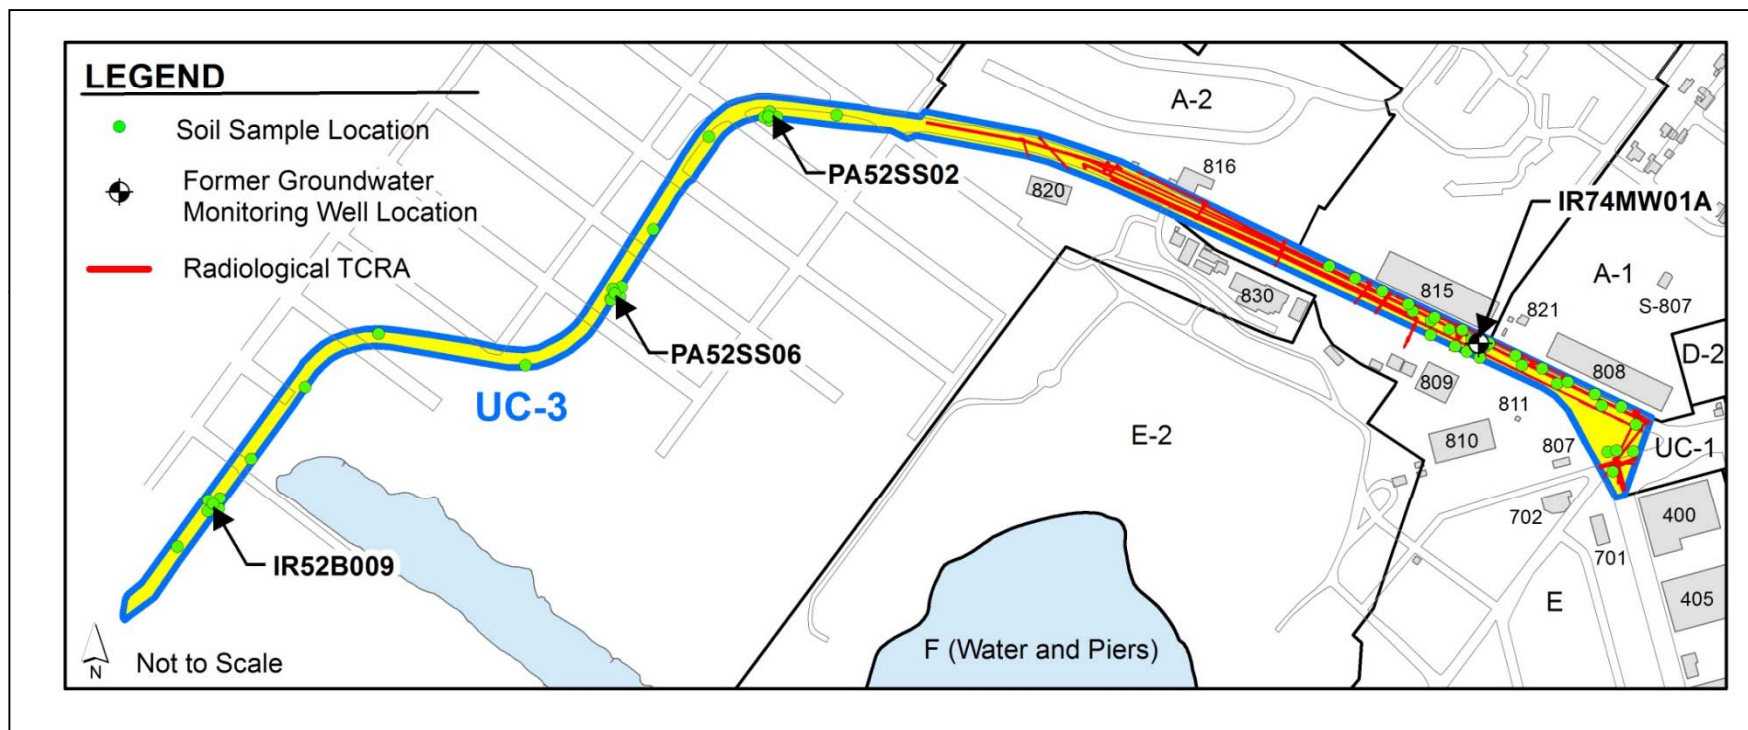

Parcel UC-3 Overview

Parcel UC-3 Previous Sampling and Removal Action

HOTSPOTS	COC
IR52B009	SVOCs
PA52SS06	Metals
PA52SS02	TPH

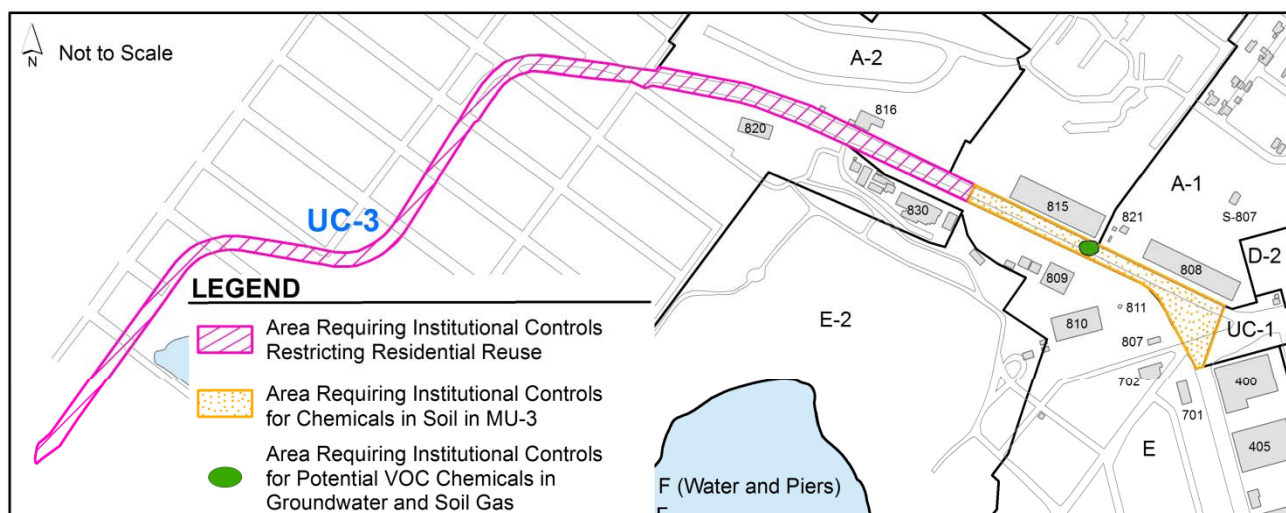

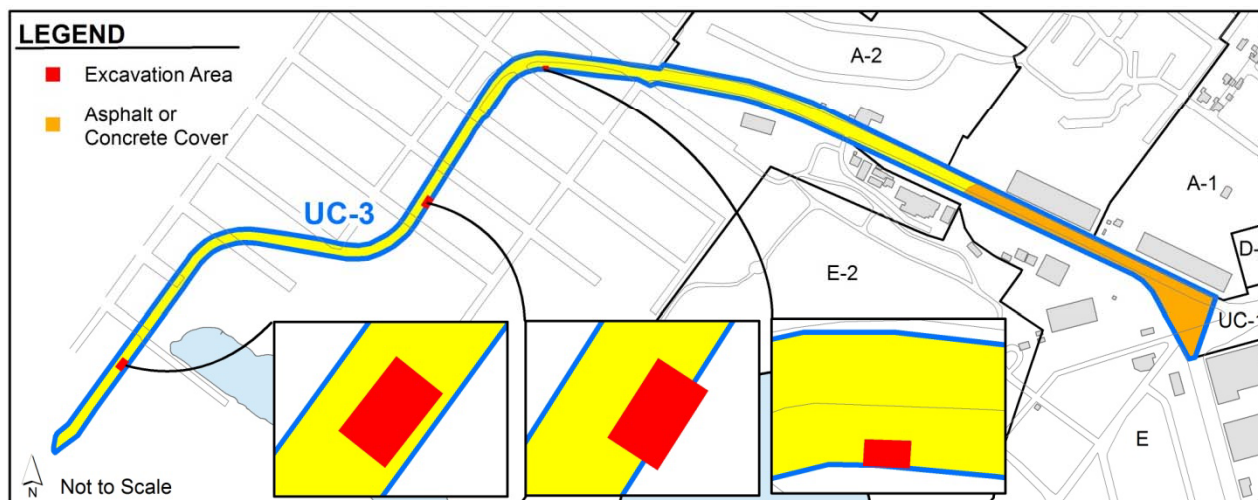

Parcel UC-3 Remedy

- Removal and offsite disposal of contaminated soil in selected areas that contain high concentrations of chemicals
- Removal and disposal of materials and soil with radiological contamination (Complete)
- Install a durable cover consisting of asphalt and concrete surfaces corresponding with reuse area MU-3 on the eastern portion of Parcel UC-3
- Sample, clean and close steam lines, as needed, within Parcel UC-3
- Soil gas monitoring at the IR-56 plume, where volatile organic compound (VOC) contamination is present in groundwater
- Groundwater treatment by injection of biological nutrients to break down VOCs to nontoxic compounds
- Monitor and maintain the durable cover
- Groundwater monitoring of the VOC plume
- Use of institutional controls to restrict specific land uses and activities within portions of Parcel UC-3

Parcel UC-3 Remedy
